

AES# AE-st05
AutoEnginuity Scan Tool
w/CAN for Generic OBD-II
Available for Palm, Pocket and PC

AES# AE-sp01
AutoEnginuity: Pro-Line Bundle
Generic w/CAN plus Enhanced software

The AutoEnginuity scan tool is a robust yet in-expensive scan tool for professional automotive technicians. It operates on PC and PDAs (Palm and Pocket) and provides Generic OBD2 and CAN coverage. Options for enhanced coverage and wireless communication are available. (See Selection Guide on following page).

Includes translated Mode 6

Mode 6 data is fully translated and the data results scaled per the manufacturer's own specifications. If a system test fails, now you can see the results from the failing component, not just the system.

What the AutoEnginuity ScanTool can do:

- CAN as well as SAE: J1850 (PWM & VPM), ISO-9141-2, ISO-14230 [KWP2000]
- Support for the OBD2 extended sensor list (that's 83 sensors--not 32).
- Read Stored and Pending P, U, B, C Trouble Codes
- Read and clear Freeze Frame data
- Clear the Check Engine or Service Engine Soon indicator
- View live vehicle sensors in a meter, graph, and gauge format
- View oxygen sensor live data and test results
- View all 11 Inspection/Maintenance system test results
- Translated Mode 6 data
- Mode 9 support. Full ECM information including CAL, CVN, and VIN reporting.
- Unlimited logging of Diagnostic Trouble Codes and live vehicle sensors
- English or Metric (SI) units of measure supported
- Run and query specific component and system tests
- View generic and manufacturer enhanced data on the same tool
- Configure the interface to suit your preferences
- VIN reporting
- Wide-band O2 sensor support
- Configure sensors' ranges, scaling value, audible alert triggers, units, sampling rate.

Updates

Software updates for the Generic software are free. Software updates for enhanced software are free for 1-yr after purchase, thereafter, \$60.00. Hardware and newly released coverage available after your initial purchase will cost extra.

Contents of AES# AE-st05

- Generic OBD2 and CAN software
- OBD-II vehicle interface
- Serial interface cable (See note)
- User Guide
- Quick Installation Guide

Contents of ProLine Bundle
(AES# AE-sp01)

- Generic and CAN
- GM • Ford • Chrysler/Dodge/Jeep
- Honda/Acura • Hyundai and Kia
- Mazda • Nissan/Infinity
- Mitsubishi • Subaru
- Toyota/Scion/Lexus
- Speedtracer
- CD-ROM with Software
- User Guide • Quick Start Guide

Also available:

- Domestic Bundle** (AES# AE-sp05)
- Asian Bundle** (AES# AE-sp06)

Contents of Euro Bundle
(AES# AE-sp07)

- Generic and CAN
- Audi/VW • BMW/MINI • Jaguar
- LandRover • Mercedes • Porsche
- Various Mfg specific connectors
- USB cable (8-ft long)
- CD-ROM with Software
- User Guide • Quick Start Guide

Selection Guide: choose the AutoEnginuity platform and coverage that best meets your needs.

1. Select a platform: The basic tool provides OBD2 Generic and CAN coverage on each platform:

\$249.00 for PC (USB): <http://www.aeswave.com/products/Product.asp?i=582>

\$249.00 for Pocket PC: <http://www.aeswave.com/products/Product.asp?i=457>

\$249.00 for Palm: <http://www.aeswave.com/products/Product.asp?i=456>

They all have the same capabilities for Generic OBD2 and CAN coverage.

For only \$60.00 more you can add a second platform to your order. For example, if you buy the Palm version for \$249.00 you can add the PC version for only \$60.00. <http://www.aeswave.com/products/Product.asp?i=513>

2. Do you need more than Generic OBD2 coverage? Get a bundle package ...

ProLine Bundle

AES# AE-sp01: <http://www.aeswave.com/products/Product.asp?i=510>

• Includes all of the hardware and software coverage of the Domestic Bundle and Asian Bundles.

Domestic Bundle

AES# AE-sp05: <http://www.aeswave.com/products/Product.asp?i=739>

Hardware and software for • Generic and CAN • GM • Ford • Chrysler/Dodge/Jeep

Asian Bundle

AES# AE-sp06: <http://www.aeswave.com/products/Product.asp?i=740>

Hardware and software for • Generic and CAN • Honda/Acura • Hyundai and Kia • Mazda • Mitsubishi • Nissan/Infinity • Subaru • Toyota/Scion/Lexus

Euro Bundle

AES# AE-sp07: <http://www.aeswave.com/Products/Product.asp?i=807>

Hardware and software for • Generic and CAN • Audi/VW • BMW/MINI • Jaguar • LandRover • Mercedes • Porsche

Custom Bundles Available!

Mix and match a combination of manufacturers to create your own bundle. Call us at 877-351-9573.

3. Communication options for PC:

For PC: USB cable: included with the purchase of PC platform package.

For PC: Wireless: 500ft RF Wireless: <http://www.aeswave.com/Products/Product.asp?i=511>

For PDA (Palm and Pocket): You supply the serial cable to connect your PDA to the AE-scantool serial connector.

4. Updates?

Updates for the Generic CAN/OBD2 coverage is available for free.

Updates for the manufacturer specific coverage are free for the first year after your purchase and \$60.00 afterwards.

Newly released coverage available after your initial purchase will cost extra.

Hardware updates are never free.
