

ABS SENSOR PINPOINT TESTER

The quickest most comprehensive Wheel Speed Sensor diagnostic tester available!

Works on ALL old and new style wheel speed sensors

Identify problems DVOM's will miss

Identify sensor shorts or opens

Visually verify sensor signal output

Signal simulation enables easy wire harness testing

The ABS Sensor Pinpoint Tester is the quickest way to verify proper wheel speed sensor operation. Simply connect the tester to the sensor and spin the wheel.

The parade of LED's provide visual confirmation of signal output. The signal error LED indicates erratic or intermittent signal output.

When used with a scan tool that provides wheel speed sensor data, the Signal simulation feature simplifies pinpointing wire harness problems.

Kit Contents:

- Main unit
- 14 Male/Female Flex Probe Adapters
- 2 Alligator Clip Flex Probes
- Test lead set (3 leads)
